

RURAL EDUCATION

The Mendota Emergency Telephone System Board will be using the Rural Addresses as set up by LaSalle, Lee, and Bureau Counties. These fire numbers will be maintained in the on site data base and will be displayed at the PSAP.

DATA BASE

The City of Mendota ETSB has contracted with Verizon Telephone Company to provide the Automatic Location Identification (ALI). Verizon Data Management System is currently located in Temple Terrace, Florida. Verizon will update the data base on a daily basis during normal business days. Our system will operate on its own in house data base that will be provided to us by Verizon. This data base will be backed up on a daily basis. It will be the Mendota ETSB's responsibility to provide Verizon with information to correct any errors or to add any records found to be missing.

MISCELLANEOUS INFORMATION

PSAP TERMINAL EQUIPMENT

Each PSAP will be equipped with the following equipment:

One agent console for each Enhanced 9-1-1 position. This console contain the speed dial keys, special function keys, phone pad, and one ANI/ALI display.

A handset and or headset for each position.

One ALI/ANI printer for each PSAP.

One TDD device for each PSAP. Minimum of bi-annual training.

One cabinet containing miscellaneous hardware for the system.

The data base is password protected for different entry levels into the system. It will also keep a log of all entry attempts and the individual trying to make entry. This password entry system will be controlled Brian Fisher, Board Chairman.
